

Curious About **PEX Fittings Of Brass Crimp Style?** Know More Here!

One of the most common as well as reasonably priced **PEX fittings** are the crimp styled ones. You get access to most of these in most of the supply houses, online stores as well as stores that sell home improvement equipment. As the name suggests and as you might have already guessed, such fittings are manufactured from brass and hence the name! • [PEX x Copper Fitting Elbows](#)

- [PEX x Copper Pipe Elbows](#)

- [PEX x Male Threaded Elbows](#)

- [PEX x Female Threaded Elbows](#)

- [Drop Ear Elbows \(PEX x FPT\)](#)

These **brass PEX fittings** are made as per stringent ASTM standards such as the F1807 and provide complete compatibility with various kinds (A,B,C) as well as **PEX tubing** brands.

When it comes to the installation of **PEX fittings** of brass, these can be installed in either of these ways:

- Crimp technique: In such a mode of installation, you need to have crimp rings made of copper as well as crimp tool PEX. Both of these **PEX fittings** are made to adhere to stringent ASTM F1807 standards.
- Clamp technique: In this technique of **PEX fitting installation**, you need to have cinch or clamp tool as well as cinch clamps made of stainless steel. Both of these are made as per ASTM F2098.

Thus, if you're the DIY kind of person and want to try **PEX fitting installation**, by following these steps, you will find it very easy!
